

Life Transitions Aid

ALIGN

Aligning People with Purpose.

DIVISION

Community Development
Behavioral Health · Workforce

STATUS

Operational
Pilot — Travis County, TX

PLATFORM

thriveup.app
lifetransitionsaid.org/thriveup/align

PREPARED BY

The Collaborative Advocate Foundation (TCAF)

Terry Flood, Ph.D., President

terryflood@thrivingcommunitiesforall.com

STRATEGIC OVERVIEW

MISSION

To align individuals, families, organizations, and communities with the resources, relationships, and roadmap needed to move from awareness to action — and from survival to contribution.

VISION

A world where every person has a structured, supported pathway from their first moment of need to becoming a contributor in their community — regardless of background, circumstance, or starting point.

EXECUTIVE SUMMARY

Life Transitions Aid | ALIGN is a trauma-informed, community-powered growth framework that meets people where they are and walks with them through six structured phases: Assess · Listen · Integrate · Guide · Navigate · THRIVE. Built on six evidence-based frameworks — CFIR, RE-AIM, EPIS, RNR, FHIR, and Title IV-E Clearinghouse standards — ALIGN provides individuals with a personal growth journey, organizations with a capacity and program-alignment tool, and communities with a collective impact dashboard. Currently piloting in Travis County, Texas through TCAF, with active ecosystem partners across Central Texas. The platform is designed for Hub-based replication across all 50 U.S. states.

PROBLEM

The Gap

Millions of Americans cycle through crisis services without ever building the foundation for long-term stability. Referral systems connect people to services — but no platform tracks growth across multiple systems over time.

Why It Matters

Without a shared growth language and tracking system, communities cannot demonstrate that their investment produces lasting change — only service delivery volume.

MARKET OPPORTUNITY

Market Size

40M+ Americans living in poverty. \$50B+ annually in federal community development funding. 1.5M+ nonprofits serving vulnerable populations.

Policy Drivers

SDOH equity initiatives, DOL workforce equity agenda, FHIR interoperability mandates, place-based investment strategies, family-first prevention services.

SOLUTION OVERVIEW

ALIGN is a six-phase growth framework implemented through a digital platform that tracks individual journeys, measures organizational capacity, and aggregates community-level impact. It is the growth layer that existing service platforms are missing — not a replacement for referral tools, case management, or benefits systems, but the framework that connects them to a shared measurement of human progress.

ECOSYSTEM ROLE

Purpose

The growth layer that connects individual service delivery to long-term community impact measurement.

Outputs

ALIGN phase scores, org capacity assessments, community gap reports, funder evidence packages.

Who Experiences It

Individuals navigating housing instability, workforce barriers, health disparities, justice involvement, foster care aging-out, and family crisis — and the organizations trying to serve them.

Cost of Inaction

Communities continue to be served but not transformed. Funders lose confidence in community-based interventions. People remain in cyclical crisis rather than advancing to stability and contribution.

Funding Landscape

Federal (HHS, DOL, DOJ, HUD, USDA), state, and private philanthropy. Title IV-E, WIOA, CDBG, SSBG, and community health grant streams.

Timing

Post-COVID recovery investment cycle. Growing demand for cross-sector outcome frameworks. Increasing funder focus on measurable community transformation vs. activity counts.

Inputs

Individual self-assessments, org profiles, program data, referral outcomes, benefits screening results.

Connected Platforms

ThriveUp Academy (15 service platforms), Unite Us, 211, HMIS, SAM.gov, BidNet, Epic (planned).

PLATFORM CAPABILITIES

CORE CAPABILITIES

- 1 Individual ALIGN Journey**
Six-phase personal growth tracker (Assess !' Listen !' Integrate !' Guide !' Navigate !' THRIVE) with Spirit · Soul · Body self-assessment (0–100 scoring), phase-specific resource routing, and personal notes.
- 2 Organizational ALIGN Assessment**
Mission · Culture · Capacity scoring (org parallel to Spirit · Soul · Body), phase coverage mapping, and program-to-phase tagging so funders see exactly where each org fits in the ecosystem.
- 3 Community THRIVE Dashboard**
Aggregate individual + org phase distribution, gap analysis (which phases have zero org coverage), and community Spirit · Soul · Body scores — the funder-facing evidence layer.
- 4 Benefits Navigation**
9+ benefit programs screened per session with warm handoffs to ALIGN journey. 107-language AI interface. Serves individuals in their first language.
- 5 Workforce Development Integration**
Employer connections, skills gap assessment, apprenticeship pathways, and ALIGN Navigate-phase resources for economic mobility.
- 6 Grant Intelligence**
Live integration with SAM.gov, BidNet, and RFPMart. ALIGN org profiles inform grant matching. RFP Fidelity Engine produces compliance-matrix-driven proposals.
- 7 107-Language AI Interface**
Navigator and all participant-facing surfaces in 107 languages. Context-aware, dignity-first responses powered by 4-engine AI (OpenAI, Anthropic, Gemini, OpenRouter).
- 8 Integration Through Invitation (ITI)**
8-layer consent model, all defaults OFF. Data sovereignty for shadow workers, peer mentors, promotoras. Stipend and credentialing pathways built in, not aspirational.

TECHNOLOGY ARCHITECTURE

AI Components

4-engine AI (OpenAI GPT-4o, Anthropic Claude, Gemini, OpenRouter). Ethical/EI preamble on all calls. Context-aware RAG knowledge base. 107-language interface.

Security Model

Replit Auth session validation. Server-side authorization on all sensitive routes. Ecosystem key authentication for platform-to-platform trust. No client-side trust.

INTELLECTUAL PROPERTY

ALIGN Framework

Proprietary six-phase growth framework authored by Dr. Terry Flood, Ph.D. Integrates CFIR, RE-AIM, EPIS, RNR without replacing them.

Spirit · Soul · Body Assessment

Three-domain holistic wellness scoring (0–100 each) consistent with biopsychosocial frameworks used in clinical and public health settings.

Five-Lens Design Doctrine

Implementation science + psychology + data engineering + community health worker + UX design — held simultaneously in every platform decision.

Data Architecture

PostgreSQL (Drizzle ORM). FHIR-compatible data structures. 0-PHI-egress design. Auditable witness log on all data access events.

Integration Capabilities

FHIR / CDS-Hooks. SAM.gov, BidNet, RFPMart APIs. HMIS bridge (in progress). Unite Us bidirectional referral sync (in progress).

Integration Through Invitation (ITI)

8-layer consent architecture with shadow worker credentialing. Named and documented June 2026. Community governance model, not just a feature.

Community THRIVE Index

Aggregate scoring algorithm combining individual phase distribution, org capacity averages, and phase gap analysis into a single community-level indicator.

Shadow Worker Credentialing Model

Pathway from informal community contribution (promotora, peer mentor, driveway journeyman) to formal recognition, stipend, and credential.

WHY WE WIN

- We track growth, not just service delivery — the only platform doing this at individual + org + community levels simultaneously.
- Six established evidence frameworks integrated — not invented from scratch. CFIR meets Spirit · Soul · Body.
- Community data sovereignty is architecture, not a feature. ITI is the governance model that communities of color actually trust.
- 15-platform ecosystem means ALIGN data has real context — housing connects to workforce connects to health in a single growth record.
- Two-entity structure (nonprofit + LLC) provides financial stability that single-entity community platforms lack.

TRACTION, IMPACT & VALIDATION

CURRENT STATUS

Platform:	Operational — live at thriveup.app and lifetransitionsaid.org/thriveup/align
Deployment:	Active pilot — Travis County, Texas (Williamson, Hays, Bastrop, Caldwell counties)
Partners:	Active ecosystem: Minority Center of Excellence, LifeBridge, SafeCogniCare, El Buen Samaritano, North Wilco Childcare Coalition
Technology:	15 platforms operational · 107-language AI · 4-engine AI · SAM.gov/BidNet/RFPMart integrated
Outcomes Data:	Accumulating — first case study documentation Q3 2026. Phase advancement data in active collection.

EVIDENCE OF TRACTION

15 Service Platforms

Benefits screening, workforce development, grant intelligence, foster youth, justice re-entry, community health, coalition management, and more — all operational.

Active Coalition Relationships

MOUs and active data-sharing partnerships with multiple Central Texas organizations. Coalition dashboard tracking joint outcomes.

107-Language Interface

AI-powered navigation in 107 languages serving multilingual communities without requiring English proficiency.

Grant Pipeline

SAM.gov-tracked federal and state grant pipeline. RFP Fidelity Engine producing compliance-matrix-driven proposals.

BUSINESS MODEL

Revenue Stream 1 — Grants

Federal (HHS, DOL, DOJ, HUD), state, and private foundation grants. Multi-year grants prioritized. No single grant >40% of operating revenue.

Revenue Stream 2 — Hub Licensing

Hub Adoption Kit: packaged platform for regional community infrastructure operators. SaaS licensing model for other counties/states.

Revenue Stream 3 — Research

University and think-tank partnerships for evaluation design, data access (with consent), and co-publication.

Revenue Stream 4 — Government Contracts

Direct service contracts with city, county, and state agencies for benefits navigation, workforce, and community health services.

IMPACT FRAMEWORK

Inputs	Individual self-assessments, org profiles, program participation data, community needs data, benefits screening results.
Activities	ALIGN journey facilitation, org capacity building, benefits navigation, workforce development, grant intelligence, coalition coordination.
Outputs	Phase advancement events, org assessments completed, benefits programs screened, programs mapped, community gap reports generated.
Outcomes	Individuals advancing from crisis to stability to contribution. Orgs increasing Mission/Culture/Capacity scores. Communities reducing phase coverage gaps.
Long-Term Impact	Communities where every person has a growth pathway and every organization knows where it fits — measurably demonstrated to funders.
KPIs	% individuals advancing "e1 ALIGN phase per 90 days · community gap score reduction · # orgs completing assessments · # funder evidence packages generated.

VALIDATION STRATEGY

Implementation Science

CFIR outer/inner setting assessment in Assess phase. RE-AIM community-level evaluation in THRIVE phase. EPIS org readiness tracking across all phases.

Evaluation Design

Mixed-methods: quantitative phase progression scoring + qualitative participant narrative (aggregated with explicit consent — aggregateMyData=true).

Research Design

Pre/post ALIGN phase scoring. Community THRIVE Index change over time. Comparison between orgs with vs. without ALIGN framework adoption.

Continuous Improvement

Quarterly data review. Participant feedback loop !' program iteration. Phase criteria refinement based on transition velocity data.

ROADMAP, PARTNERSHIPS & INVESTMENT

12 MONTH OBJECTIVES (2026–2027)

Technology

Mobile offline mode (Q4 2026). HMIS integration. Unite Us bidirectional referral sync. Salesforce NPSP connector (roadmap).

Partnerships

3 signed research partnerships. 10 new coalition MOUs. 1 federal agency pilot designation.

24-MONTH OBJECTIVES (2027–2028)

Scale

Hub Adoption Kit deployed in 5+ additional counties/regions outside Texas.

Expansion

2 additional states with active Hub operators. International adaptation scoping (Central America, Caribbean, West Africa).

Customer Growth

50+ organizations completing ALIGN assessments. 500+ individual journeys active. 5 Hub Adoption Kit deployments initiated.

Revenue

First Hub licensing agreements executed. 3 government service contracts. \$500K+ ARR target.

Validation

Peer-reviewed publication of ALIGN framework efficacy. Title IV-E Clearinghouse evaluation submitted.

Revenue

\$1M+ ARR. Federal agency recognition. DOL/HHS pilot designation.

36-MONTH VISION

- National: Hub Adoption Kit active in all 50 states. Federal government strategic partner.
- International: ALIGN framework adapted for international development contexts (Central America, Caribbean, West Africa).
- Platform Evolution: AI-driven phase prediction · peer mentor matching algorithm · employer direct hiring pipeline.
- Strategic Positioning: The national standard for community growth frameworks — as recognized as CFIR is in implementation science.

PARTNERSHIP OPPORTUNITIES

Funding Partners

Robert Wood Johnson Foundation, Annie E. Casey Foundation, W.K. Kellogg Foundation, JPMorgan Chase, HHS, DOL, HUD, DOJ.

Technology Partners

Epic Health Systems (FHIR integration), Salesforce.org, Unite Us, Microsoft Azure AI, AWS community programs.

Community Partners

Faith networks, HBCUs, tribal nations, promotora networks, community health worker associations, peer specialist networks.

Research Partners

UT Austin, Texas A&M, Morehouse School of Medicine, Howard University, RAND Corporation, implementation science institutes.

Government Partners

Texas HHSC, Travis County, City of Austin, HUD, DOL Employment & Training Administration, AmeriCorps.

Industry Partners

Healthcare systems, equity-committed employers, CDFIs and financial institutions, housing authorities.

RISK MANAGEMENT

Risk: Platform sustainability if TCAF loses funding

Mitigation: Two-entity structure (nonprofit + LLC). Hub licensing creates earned revenue independent of grant cycles. Open-source commitment on dissolution.

Risk: Community data trust

Mitigation: ITI architecture: 8-layer consent defaults OFF. Full data portability. Zero PHI egress. Witness log available to all contributors.

Risk: Adoption resistance from established platforms

Mitigation: Complement positioning — we fill the gap they leave, not replace them. Demonstrated in the vs-alternatives framework on every stakeholder surface.

Risk: Outcomes data lag

Mitigation: Leading indicators (phase advancement velocity) are available immediately. Lagging indicators (housing, income, employment) accumulate over 12–24 months with proper attribution.

INVESTMENT NEED

Capital Requested

\$2.5M over 24 months (grants, impact investment, and/or government contract).

Expected Outcomes

50+ org assessments · 500+ individual journeys · 5 Hub deployments · 2 peer-reviewed publications.

Use of Funds

Technology & integrations 40% · Community outreach & org onboarding 25% · Research & evaluation 20% · Operations & team 15%.

Key Milestones

Q3 2026 — first case study · Q4 2026 — mobile offline · Q1 2027 — first Hub license · Q4 2027 — 5 Hub deployments.

STRATEGIC ASK

- Funding: \$2.5M seed/growth capital — grants, impact investment, or government service contracts.
- Pilot Participation: Organizations willing to complete ALIGN assessments and share outcome data under ITI consent.
- Research Collaboration: University partners for evaluation design, peer-reviewed publication, and framework validation.
- Technology Integration: EHR, HMIS, and referral platform partners for bidirectional data interoperability.
- Strategic Advisory: Implementation scientists, equity-focused policy advocates, and community organizers.

Closing Statement

If Life Transitions Aid | ALIGN succeeds, we will live in a country where a person's first moment of need marks the beginning of a documented growth journey — not a cycle of crisis. Organizations will know exactly where they fit in their community's ecosystem. Funders will see growth, not just service. Communities will have the evidence they need to demand the investment they deserve. ALIGN is the missing layer between doing good and proving it.
