National Community Infrastructure Platform

Connecting people to opportunity — at scale, with evidence, in every language.

AT A GLANCE

15	721	107	5
Live Service Platforms	Funding Opps Tracked	Languages (89 spoken + 18 signed)	Industry-Grade Trade Simulations
WORKFORCE DEVELOPMENT		GRANT INTELLIGENCE	
Five industry-grade trade simulations — electrical, plumbing, welding, automotive, HVAC — built on the same solvers used in engineering training: - Modified Nodal Analysis (MNA) electrical solver - Hardy-Cross Newton-Raphson pipe-network solver - AWS D1.1 welding heat-input evaluator At 80% lesson completion the platform routes learners to OSHA 10, NCCER, AWS, ASE, and EPA credentials, and to IBEW, United Association, and ABC registered apprenticeship pathways.	721 funding opportunities tracked across SAM.gov, Grants.gov, USASpending, and foundation sources. AI fit-scoring, proposal and narrative generation, and a full grant operations command center — operational maturity most organizations build toward for years.	JUSTICE & REENTRY	Production-grade RNR (Risk-Need-Responsivity) case management, CBI program tracking, family visitation coordination, and NRRC-standard outcome reporting. Not a vision — a running system
BENEFITS & NAVIGATION		FOSTER YOUTH TRANSITION	
Real-time eligibility screening for SNAP, housing, healthcare, and safety-net programs. AI that speaks plain language and honors dialect — preserving AAVE, Spanglish, and regional speech — not bureaucratic translation.		50-state policy comparator with statute citations. Education and Training Voucher navigation, Chafee eligibility, Medicaid-to-26 routing, 4-domain AI risk engine (housing / food / mental health / documents), and PRTY case plans for youth and caseworkers.	IMPLEMENTATION SCIENCE
ACADEMY & FINANCIAL EMPOWERMENT		39 CFIR constructs, RE-AIM evaluation framework, and NRRC fidelity benchmarks instantiated in code — not cited in a methods section. MAP-GAP continuous quality improvement. FHIR/CDS-Hooks clinical interoperability. Zero PHI egress.	
Live economic simulation — wallets, portfolios, branching life-scenario narratives, and financial literacy — making FAFSA, apprenticeship, and early-career decisions legible to young people and their families.			
INTEGRATION THROUGH INVITATION — THE INITIATIVE BEHIND THE PLATFORM			
HBCUs have long known that the most trusted community infrastructure is not in office buildings. It lives in faith halls, barbershops, neighborhood kitchens, and the phones of community health workers who have never been paid for what they do. ThriveUp Academy's Integration Through Invitation framework names those workers, stipends them, credentials them, and integrates their knowledge into the systems serving their own communities — with layered consent, no extraction, and real career pathways. Every surface of the platform carries this commitment.			
PARTNERSHIP OPPORTUNITY			
ThriveUp Academy is architected for interoperability. HBCU workforce programs, community health institutes, reentry partnerships, and academic research centers can connect directly through a secure Partner API — pulling platform data for their own programs or contributing community insights back into the network. We are actively seeking institutional partners who share this vision of community infrastructure as a civil rights issue.
